

# Lesson 5: The plates are in the kitchen

Katie has a new doll's house. It's bigger than she is! It's a 4 floor mansion with three big rooms and an attic. The bathroom and living room are on the ground floor. There's a nice old bath in the bathroom, but there's no shower. The living room is cosy and has a fireplace and two sofas in it. Steep stairs go up to the first floor which is where the kitchen and dining room are. There's a large oven in the kitchen, and there are two chairs and a small table in the dining room. On the second floor there is a large bedroom and two balconies. Above the bedroom is the attic where things like old mirrors and prams are kept. Katie likes her doll house!
